Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION***Response to Arguments***

Claims 1-52 are currently pending in the application. The Applicant has provisionally elected claims 1-4, 6-13, 15-30, 32-39 and 41-52. The Examiner does not believe this is enough to satisfy the election/restriction requirement. Even with the elected claims, 12 independent claims and 3 separate inventions are still elected. The Examiner believes this would cause undue burden due to the scope of searching in different search areas. The Examiner has more clearly defined the various species below and requests the applicant to choose one of the groups below.

Election/Restrictions

This application contains claims directed to the following patentably distinct species: claims 1-23 and 25 (Group I) are directed towards an image processing apparatus (or method/program/medium encoding a program) for obtaining version information of APIs of an application and APIs of the system service and performing comparison of the versions. Group I can be classified in class 358/1.15. 27-49 and 51 (Group II) are directed towards an information processing apparatus (or method/program/medium encoding a program) for obtaining version information of APIs of an application and APIs of the system service and performing comparison of the versions. Group II can be classified in class 717/168. Claims 24, 26, 50, and 52 (Group III) are directed towards an image forming apparatus (or method/program/medium encoding a program) for determining whether to tentatively or normally launch an

Art Unit: 2625

application on the basis of a request from the system service and for providing information on the application to the system service. Group III can be classified in class 358/1.13. The species are independent or distinct because although Group I is directed towards an image processing apparatus, while Group II is directed towards an information processing apparatus (which is much more broad and can encompass anything capable of processing information that needs a software update). Group III is directed towards another invention not dealing with version checking and comparing. Thus, the three Groups would cause undue burden for the Examiner to search in three distinct areas for three distinct inventions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
